

Institute Seminar Astrophysics

Summer term 2023, Wednesday 10-12h

chairs: Prof. Ralph Neuhäuser & Prof. Alexander Krivov

Schedule

- Apr 12: Preliminaries
- Apr 26: Kai-Uwe Michel & Markus Mugrauer: Multiplicity of exoplanet host stars (new paper)
- May 3 **10:45h s.t.**: Pouyan Rezvani (PAL Munich): The most widely distributed medieval Arabic translation of Ptolemy's Almagest
- May 10: TBD
- May 17: Eleni Vardoulaki (TLS): The role of active galaxies in galaxy evolution and the exascale future of radio astronomy
- May 24: Tim Pearce: What debris-planet interactions can teach us about planetary systems in the JWST era
- May 31: (Universe on Tour in Jena)
- June 7: institute full meeting
- June 14: Kai-Uwe Michel: Nearby high-mass X-ray binaries (PhD update)
- June 21: Antranik Sefilian: Mind the gap: interactions between planets and massive debris discs
- June 28: Satenik Ghazaryan (Byurakan Astrophysical Observatory, Armenia): Chemical abundances stratifications in the atmospheres of Chemically Peculiar stars and statistical analysis of them
- July 5: Pedro Poblete: PhD defense test talk

(last update: 28 Apr 2023)
